

Nevada Housing Affordability Toplines

Sample of 1,000 Nevada registered voters. Toplines are unweighted because no survey weight variable was included in the raw data file. As a result, findings should be interpreted as directional estimates rather than fully representative population estimates. The topline below summarize statewide attitudes toward housing affordability, development, rent regulation, and related housing policy tradeoffs.

Housing Cost Seriousness

Response	N	Percent
Very serious	638	64%
Somewhat serious	312	31%
Not too serious	49	5%
